

POWERING INDIA'S CLEAN ENERGY FUTURE

Solar • BESS • EPC • IPP • Open Access • Group Captive

A renewable energy infrastructure platform — developing, building, and owning utility-scale solar and BESS assets.

KEY PLATFORM HIGHLIGHTS

Five strategic anchors that define our renewable infrastructure platform.

INTEGRATED PLATFORM • DEVELOPER-LED • INSTITUTIONAL CAPITAL READY

PLATFORM LIFECYCLE

Integrated renewable infrastructure delivery — from origination to long-term ownership.

ONE PLATFORM. SIX DISCIPLINES.

Potentiall delivers every stage in-house — origination, structuring, engineering, execution, ownership, and energy delivery — under one accountable platform.

CORE CAPABILITIES

Five capabilities, one integrated platform.

Single-stack accountability — origination through ownership.

CORE VALUES

The principles that guide every project, partnership, and decision.

OPEN ACCESS MODEL

Cleaner, cheaper, contracted power — wheeled to industry through the grid.

30–40%

Energy cost optimisation

LONG-TERM

Tariff certainty

REC + RPO

Compliance ready

REDUCED

Carbon footprint

GROUP CAPTIVE STRUCTURE

Industrial off-takers participate as captive owners of the SPV.

Group captive enables qualifying industrial consumers to access captive tariffs and full RPO compliance.

EPC CAPABILITIES

End-to-end project execution — feasibility through commissioning.

O & M — ASSET MONITORING

Lifecycle asset management to safeguard generation and revenue.

24/7 MONITORING

Round-the-clock remote ops

PREVENTIVE M&D

Scheduled & corrective maintenance

SCADA ANALYTICS

Plant-level performance benchmarking

LIFECYCLE OPS

Repowering & residual value protection

SCADA OPERATIONS DASHBOARD

99.4%

Availability

0.81

Performance ratio

4.7

kWh / kWp / day

12

Open alerts

PR — last 30 days

BATTERY ENERGY STORAGE

Solar + storage builds firm, dispatchable infrastructure assets.

BESS transforms intermittent solar into a contracted, dispatchable infrastructure asset.

INDIA DEVELOPMENT CORRIDORS

Road Map

KARNATAKA	Up to 300 MW	
ANDHRA PRADESH	Up to 200 MW	
MAHARASHTRA	Up to 500 MW	
Expansion Corridors		
TAMIL NADU	GUJARAT	RAJASTHAN
PHASE-1 PLATFORM TARGET		1 GW

CAPACITY BUILD-OUT TIMELINE

From 50 MW to 10 GW — the five-year deployment trajectory.

200× capacity growth across five years — built for institutional capital and long-term off-takers.

INDUSTRIES WE SERVE

Targeted sectors with high power consumption and ESG mandates.

MANUFACTURING

C&I off-taker segment

DATA CENTRES

C&I off-taker segment

AUTOMOTIVE

C&I off-taker segment

WAREHOUSING

C&I off-taker segment

COMMERCIAL CAMPUSES

C&I off-taker segment

INFRASTRUCTURE

C&I off-taker segment

BANKABLE OFF-TAKE • LONG-TENOR PPA • GROUP CAPTIVE READY

PLATFORM DIFFERENTIATORS

Five differentiators that set our platform apart.

01

Integrated Solar + Storage

Single-stack delivery
— generation + BESS
for firm output

02

Open-Access Structuring

Wheeling, banking,
tariff structuring
across state regimes

03

Group Captive Execution

End-to-end SPV,
equity, and
compliance for
industrial users

04

Lifecycle IPP Ownership

Long-term ownership
aligned with off-
takers and lenders

05

Multi-State Roadmap

Disciplined capital
deployment toward
10 GW

ESG FRAMEWORK

Renewable infrastructure built with environmental, social, and governance discipline.

INDUSTRIAL DECARBONISATION • LONG-TERM INVESTMENT • COMMUNITY-ALIGNED DEVELOPMENT

REGULATORY INTERFACE

Coordinated engagement with state and central regulatory bodies — built into our delivery model.

REGULATORY TOUCHPOINTS

STATE NODAL AGENCIES

SECI, KREDL, MEDA — state-level project facilitation.

STU CONNECTIVITY

Substation connectivity & transmission planning approvals.

DISCOM APPROVALS

Open-access, banking, and wheeling agreements.

REC ALIGNMENT

Renewable energy certificate registration & accreditation.

CAPTIVE COMPLIANCE

Group captive equity verification under EA 2003 / Rule 3.

OUR APPROACH

Potentiall maintains active relationships with regulatory and grid authorities across each state in our deployment footprint. From land-use clearances and STU substation tie-ins through DISCOM open-access registration and group captive compliance, we coordinate every approval in-house — keeping projects on schedule and bankable.

We design every project with regulatory durability in mind, structuring for tariff certainty, REC eligibility, and long-term off-take protection.

Leadership built on origination, execution, and infrastructure structuring.

Ashwath Krishnappa

Execution & Engineering Partnerships

EPC delivery, engineering optimisation, and contractor management.

Vinay Christy

Infrastructure Structuring & Market Development

Open-access, group captive, and capital structuring across markets.

Poornima P

Project Development & Strategy

Project origination, deal structuring, and long-term platform strategy.

BUILD YOUR SOLAR FUTURE

WITH US

Let's structure the renewable infrastructure that powers your business.
